applicant pool of qualified temporary instructors to teach fall and spring semester courses, as well as summer courses, should an opening arise. Made possible by a \$20-million commitment from the Paul and Stacy Jacobs Foundation, Berkeley Engineering launched the Jacobs Institute for Design Innovation at the Clinton Global Initiative in June 2013. As the Institute works to further its mission of educating leading innovators at the intersection of human-centered design and emerging technologies, it provides students with hands-on experiences and opportunities to work in interdisciplinary teams to address real societal issues. Students are challenged to approach the entire cycle of design, from identifying user needs to rapid prototyping to commercialization and manufacturing, from an integrated vantage point. Lecturers will supervise student design projects, give lectures, prepare assignments and project topics & deliverables, hold regular office hours, prepare exams or hold reviews, give design advice, and submit final grades. Salary is commensurate with the highest degree, teaching experience, and equity within the Department. We are also seeking Teacher Special Programs (TSP) instructors, should an opening arise. The TSP's principal responsibilities can range from teaching a short course, providing a lecturer with industry expertise, participating in design critiques during a course, teaching at institute bootcamps, or contributing to major curriculum development. The department is interested in candidates who will contribute to diversity and equal opportunity in higher education through their teaching. Institute: <https://jacobsinstitute.berkeley.edu/> Labor Contract: <https://ucnet.universityofcalifornia.edu/labor/bargaining-units/ix/index.html> Qualifications Basic qualifications (required at time of application)

A Bachelor's Degree or equivalent international degree is required at time of application. Additional qualifications (required at time of start)

For Lecturers: Five years of experience in industry or a research institute, or advanced degree is required by the start of the appointment. For TSPs: Two years of experience in industry or a research institute, or advanced degree is required by the start of the appointment. Preferred qualifications

For Lecturer positions: A higher level degree and/or prior expertise in teaching in the following topic areas in either design or engineering schools at the undergraduate or master's level. Also desirable are a strong track record in developing and implementing new and experimental methods of delivering education and hands-on learning, and experience working with students from a range of disciplines.

For both Lecturer and TSP Positions: Experience working in industry and/or a research institute. Topic areas include: -Design process-Needs-finding, user research-Visual communication: sketching, storyboarding, portfolio development, story-telling-Prototyping and fabrication, including both traditional and/or digital methodologies-Product design/industrial design-Design technologies: embedded software development, circuit design, mechatronics, wired and wireless communication, web application development-UI/UX design and user testing methods-Data analysis and visualization-Commercialization, manufacturing, IP Application Requirements Document requirements
